

Your Task!

1

Use counters and a place value grid to calculate:

	5	9	3	4		3	2	7	5		1	7	7	2
+	2	2	4	6	+	6	1	5	6	+	2	2	5	0

Remember to use your steps to success! They are on the next page!

Mr Potato says that there is more than one possible answer for the missing numbers in the hundred's column. Is he correct? Explain your answer.

Use <, > or = to make the statements

- | | | |
|-----------------|-----------------------|-----------------|
| $3,456 + 789$ | <input type="radio"/> | $1,810 + 2,436$ |
| $2,829 + 1,901$ | <input type="radio"/> | $2,312 + 2,418$ |
| $7,542 + 1,858$ | <input type="radio"/> | $902 + 8,496$ |
| $1,818 + 1,999$ | <input type="radio"/> | $3,110 + 707$ |

	Th	H	T	O
	6	?	?	8
+	?	?	8	?
	9	3	2	5

Steps to Success:

- Line up the numbers you are adding in the correct place value column.

- Start by adding your lowest place value column.

- Remember to exchange, if the total is greater than 9.

- Remember to check for an exchanged value and add it.
